

Amazon Echo Show 10

Amazon Echo Show is a smart speaker that uses Amazon's virtual assistant, Alexa. The Echo Show has a touch screen display and also responds to voice commands. Additionally, the device features motion sensors to automatically wake up when you enter a room. The Echo Show is easy to set up- simply plug in and connect to the internet! From there you can personalize the device to best support you.

A few things you can ask Alexa to help with include:

Alexa...

what is the weather?

set a timer for [minutes].

remind me every day at 9:00 to take my medication.

remind me that July 26 is Americans with Disabilities Act day.

find a recipe for mac and cheese.

what should I wear to work today?

play me a song.

tell me a joke.

open up a workout video.
