

Flic Smart Buttons

Flic Smart Buttons enable users to control smart home devices that are typically controlled by voice with a click of a button. The Flic Smart Buttons are compatible with Alexa and Apple HomeKit products. Each button can be programmed to complete several different tasks by clicking, double clicking, or holding down the button. Each button has an adhesive back so that they can be easily attached to any surface. The buttons are also customizable with stickers or clips to wear the device on the go. The Flip Smart Buttons will last up to 24 months on a single battery however, when the battery needs replaced it is a simple process. The Flic Smart Buttons have a hub that must be plugged in and connected to wifi and then, the buttons work via bluetooth technologies.
