

Scanmarker Reader

Scanmarker Reader is the ultimate pen reader, portable, lightweight and convenient – connect easily to all your devices via Bluetooth. It can edit, read aloud in real-time through a web application and translate on computers, smartphones, and tablets in more than 100 languages. This pen can help you when you have identified an individual at risk of reading failure and give them true reading and learning independence. Individuals can gain and improve decoding and reading comprehension skills together. Users can add significant gains in phonemic awareness, rapid naming, and phonological memory after they start using the Scanmarker Reader as an Assistive Technology.
