Wright Stuff T Grip Rocker Knife

The T-Grip Rocker Knife is designed with an innovative new handle that enables people with limited hand control or grasp to eat independently. This adapted knife requires less strength and dexterity than regular knives for cutting food.

This knife is intended to be used with a back-and-forth rocking motion. Using an overhand or underhand grip, simply apply gentle pressure to the handle with your whole hand then simply rock back and forth. The creative T-shaped handle is easy to hold. The blade is designed with smooth edges to prevent any accidental cuts. The unique handle provides a mechanical advantage so that pressure is applied from directly above the object to be cut. Users who have decreased hand strength, or who have difficulty cutting food will find the T-Grip Rocker Knife helpful for increasing dining independence.
