Every EaZyHold Size - Daily Living Aid

Movement through play drives learning in children. EaZyHold provides that pathway for exploration with low-tech, inexpensive, adaptive aids that are easily accessible and supportive of all students right from the start.

For children to adults hands and limbs, EaZyHolds ergonomic design enables those with conditions such as cerebral palsy, arthritis, limb differences, tremors, spinal cord injuries, and motor delays to easily hold and control objects of daily living.

Our soft cuffs help students to thrive and flourish in the fundamentals of art, music, writing, eating, and play without hand-over-hand assistance.
